

Genealogy Research Log

Trace Every Ancestor, Every Record, Every Story

MORE SHINE PRESS

Your Family History Journal

This log book helps you organize your genealogy research systematically. Track each ancestor, every source you consult, and every lead you follow. Over time, these pages become a permanent record of your family's story.

The Research Pages

Each ancestor gets a **two-page spread**. The left page captures vital statistics and family connections. The right page records your research sources, findings, and next steps.

Tips

- **Cite every source.** Note archives, websites, book pages, and film numbers so you can find them again.
- **Record negative results.** Knowing where you already looked saves repeating the same search.
- **Work backward in time.** Start with yourself and go back one generation at a time.
- **Talk to relatives.** Older family members are your most irreplaceable source.
