

Under the same stars, always wondering. *This journal transforms casual stargazing into systematic discovery. From seeing and transparency ratings to equipment configurations and field sketches, every observing session becomes part of your personal astronomical archive.*

WHAT'S INSIDE

- 40 two-page observation session logs
- Weather, seeing, and transparency tracking
- Bortle dark sky scale and Moon phase
- Equipment configuration per session
- Field sketch areas with dot-grid
- Stellar magnitude reference (16 entries)
- Top 20 Messier deep-sky objects guide
- Telescope types comparison and eyepiece guide
- Bortle dark sky scale (Classes 1-9)
- Seeing and transparency rating system
- Observing wishlist (24 entries)
- Equipment inventory and year-in-review
