

Beer Tasting Journal

Track Every Pint, Every Brewery, Every Flavor

MORE SHINE PRESS

Your Craft Beer Journey

This journal is your companion for exploring the world of craft beer. From hoppy IPAs to rich stouts, tart sours to crisp lagers, every beer has a story. Capture it here.

The Tasting Spread

Each tasting uses a **two-page spread**. The left page records beer details: name, brewery, style, ABV, IBU, color, serving type, and your 1-5 ratings across six sensory categories. The right page dives deeper with a 20-note flavor checklist, appearance notes, aroma, overall rating, freeform tasting notes, and food pairing ideas.

Tasting Tips

- **Look.** Note the color, clarity, and head retention.
- **Smell.** Swirl gently. What aromas come through?
- **Taste.** Take a sip. Let it coat your palate. Note flavors.
- **Feel.** Body, carbonation, warmth, astringency.
- **Finish.** What lingers after you swallow?

Key Terms

ABV = Alcohol by Volume. **IBU** = International Bitterness Units (higher = more bitter). **SRM** = color scale (pale straw to black).

MAJOR BEER STYLES

STYLE	CHARACTERISTICS
IPA	Hop-forward, bitter, citrusy or piney. 5.5-7.5%% ABV. 40-70 IBU.

👉 Understanding SRM (Color)

SRM measures beer color from pale straw (2) to black (40+). Use this when recording the appearance of each beer:

- 2-3 = Pale Straw | 3-4 = Straw | 4-6 = Gold
- 6-8 = Amber | 8-15 = Copper/Brown | 15-25 = Dark Brown
- 25+ = Black

COMMON BEER GLASSWARE

GLASS	BEST FOR
Pint Glass	The all-purpose workhorse. Good for most ales and lagers.
Tulip	Flared lip captures aromas. Great for IPAs and Belgian ales.
Snifter	Bowl shape concentrates aroma. Ideal for stouts and barleywines.
Weizen	Tall and curved. Designed for wheat beers with large heads.
Pilsner	Tall and slender. Shows off clarity and carbonation.
Goblet	Wide bowl for sipping. Good for strong Belgian ales.

 Why Glassware Matters

The right glass enhances your beer experience. Aroma is a huge part of flavor, and glasses designed to trap or release aromas can completely change how a beer tastes.

BEER GLOSSARY

ABV Alcohol by Volume. The percentage of alcohol in the beer.

IBU International Bitterness Units. Measures hop bitterness. Most beers range 5-80.

SRM Standard Reference Method. Measures beer color from pale (2) to black (40+).

Gravity Density of wort or beer. Original Gravity (OG) and Final Gravity (FG) determine ABV.

Attenuation The percentage of sugars converted to alcohol during fermentation.

Head The foam on top of poured beer. Good head retention indicates quality.

Lace The foam residue left on the glass as you drink. A sign of a well-made beer.

Body The thickness or mouthfeel of a beer. Described as thin, medium, or full.

Conditioning The period after fermentation where beer matures and develops flavor.

Dry-Hopping Adding hops after fermentation for aroma without added bitterness.

Session Beer A low-ABV beer designed for extended drinking sessions.

Imperial A stronger version of a style, typically 8% ABV or higher.
