

Photography Log Book

*Capture Every Shot, Every Setting,
Every Story*

MORE SHINE PRESS

👉 Your Photographic Journey

This log book is designed to make you a more intentional and deliberate photographer. Every great photographer keeps records -- not because they enjoy paperwork, but because reviewing past shoots is the fastest path to mastering light, composition, and technique.

👉 The Two-Page Shot Spread

Each shoot uses a **two-page spread**. The left page captures the technical details: date, location, camera body, lens, focal length, aperture, shutter speed, ISO, white balance, metering mode, and shooting mode. The right page is for your creative notes: lighting conditions, weather, composition, what worked, what to improve, and the story behind the shot.

👉 The Weekly Review

After every 5 shoots, a **weekly review page** helps you identify your best shot of the week, the biggest lesson learned, settings to practice, new techniques tried, and your total output. This is where skill is built.

👉 Tips for Best Results

- **Log each shoot immediately**, while details are still fresh in your mind.
- **Be specific with settings**. Exact aperture, shutter, and ISO values are how you learn what works.
- **Review weekly**. Patterns in light and composition emerge over many shoots.
- **Note what failed**. Mistakes are the best teachers when you write them down.
